**Re: BC Residents Support License Extension for Vancouver’s Supervised Injection Site (InSite)**

A recent survey conducted by Mustel Group among a random sample of 852 B.C. adults (+/-3.4% margin of error) shows continuing support for InSite with 63% of residents in favour of the federal government extending the license to allow the safe injection site to remain open. In contrast, only 27% are not in favour of an extension and 10% are undecided or have no opinion on the issue.

Overall support for InSite is strong across the province, with support highest in the City of Vancouver (76%).

Analysis of the findings by federal party support shows that Conservative Party supporters are somewhat divided in their support but with a slightly larger proportion in favour (50%) than not in favour (41%) of an extension.

Supporters of all other federal parties are clearly in favour of an extension.

Mustel Group is a Vancouver-based market research firm with a 25 year history and enviable record of accuracy for political polling. For our 'Proven Record of Accuracy' go to our website at: [www.mustelgroup.com/accuracy.asp](http://www.mustelgroup.com/accuracy.asp).
